CONFIDENTIAL & PROPRIETARY MASTER MANUAL

1. SYSTEM OVERVIEW & PLATFORM ARCHITECTURE

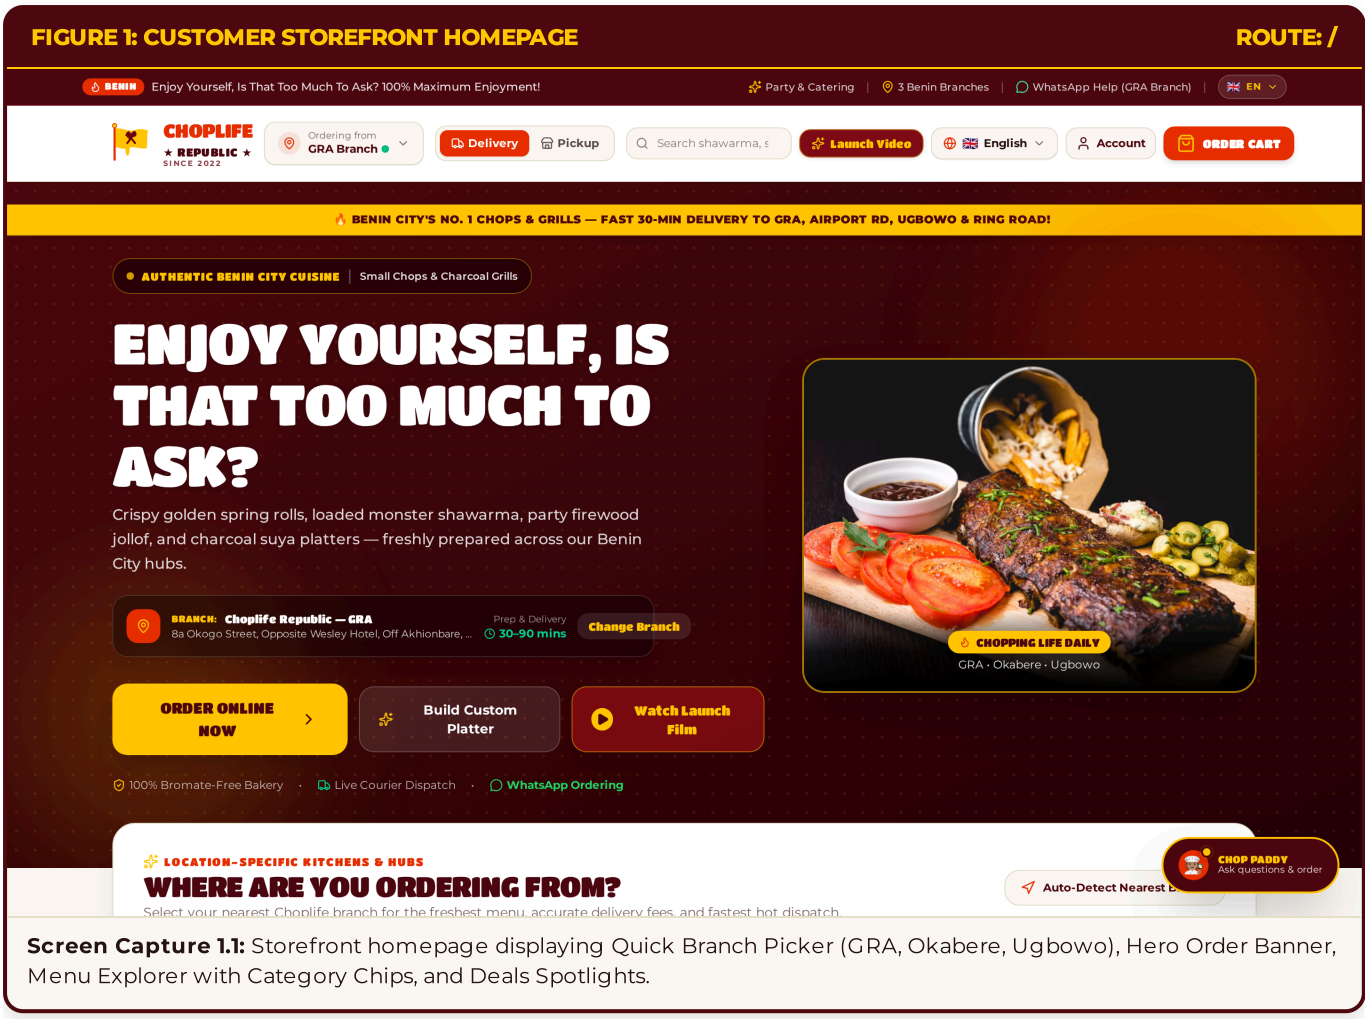

The Choplife Republic Operations Platform is a unified, full-stack Quick Service Restaurant (QSR) enterprise system designed specifically for high-volume Nigerian hospitality operations across Benin City.

Module ID	System Module	Route	Verification Status	Functional Scope
MOD-01	Customer Storefront	`/`	VERIFIED	Branch selector, multi-category explorer, custom box builder, cart, checkout & live tracking.
MOD-02	Front-Office POS Register	`/pos`	VERIFIED	Open checks, line notes, split bills, manager discounts, tender settlements & thermal receipts.
MOD-03	Kitchen Display (KDS)	`/pos`	VERIFIED	Order queue, urgency timer rings, Recipe BOM reference, bump status & SMS notifications.
MOD-04	Customer Facing Display	`/cfd`	VERIFIED	Terminal sync, neutral welcome screen, dynamic bestseller rankings & approved promo slideshow.
MOD-05	Master Inventory Manager	`/admin`	VERIFIED	Location balances, Purchase Orders (PO), Goods Received Notes (GRN), wastage logs & BOM depletion.
MOD-06	CMS & Menu Manager	`/admin`	VERIFIED	Product pricing, branch overrides, category management, package composition & promo deal manager.
MOD-07	Financial Reconciliation	`/admin`	VERIFIED	Paystack webhooks, shift Z-report closing, expense claims processing & audit logs.

2. CUSTOMER STOREFRONT MODULE (/)

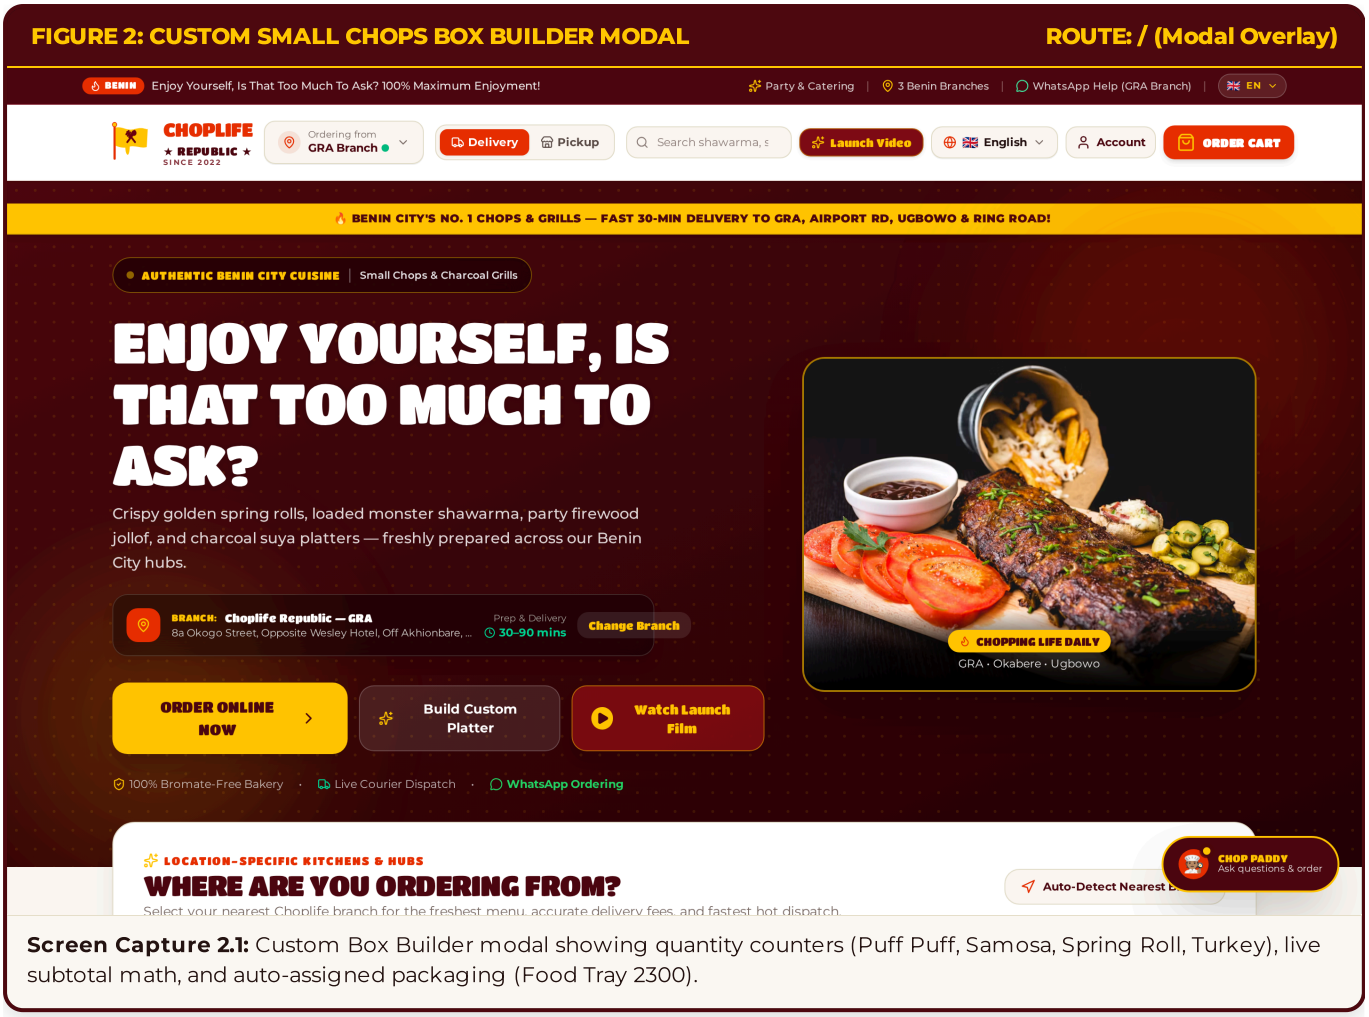

The Customer Storefront provides a seamless online channel for retail customers across Benin City.

Screen Capture 1.1: Storefront homepage displaying Quick Branch Picker (GRA, Okabere, Ugbowo), Hero Order Banner, Menu Explorer with Category Chips, and Deals Spotlights.

Interactive Custom Small Chops Box Builder

The Small Chops Box Builder allows customers to create custom box selections with automated packaging auto-assignment:

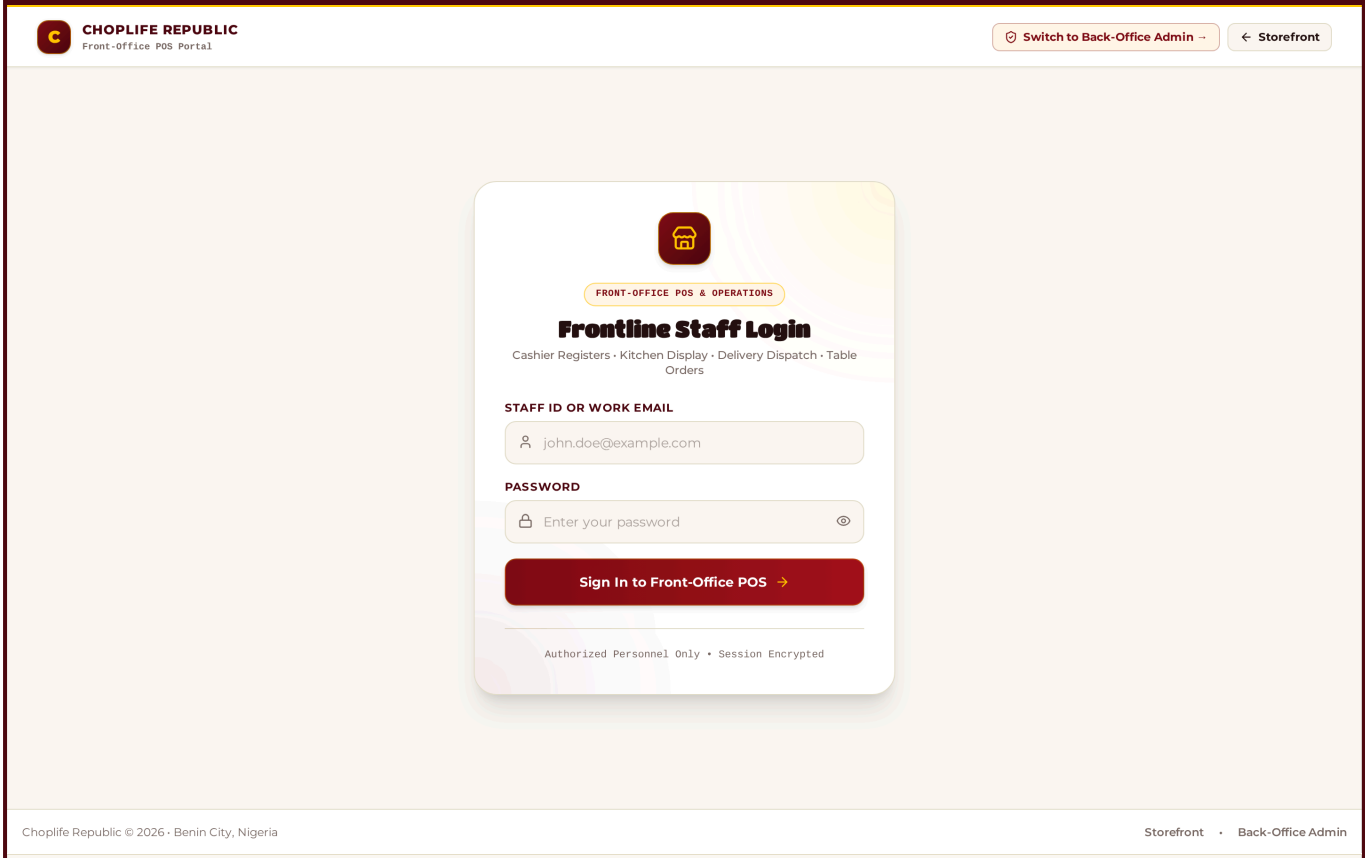

Screen Capture 2.1: Custom Box Builder modal showing quantity counters (Puff Puff, Samosa, Spring Roll, Turkey), live subtotal math, and auto-assigned packaging (Food Tray 2300).

3. FRONT-OFFICE POS REGISTER MODULE (/POS)

The POS Register Workspace equips counter cashiers with a high-speed transaction engine.

FIGURE 3: FRONT-OFFICE POS REGISTER WORKSPACE **ROUTE: /pos**

Screen Capture 3.1: Active POS Register displaying Category Navigation, Product Grid, Open Guest Check Panel (#CHK-Live), Subtotal Math, and Payment Settlement Actions.

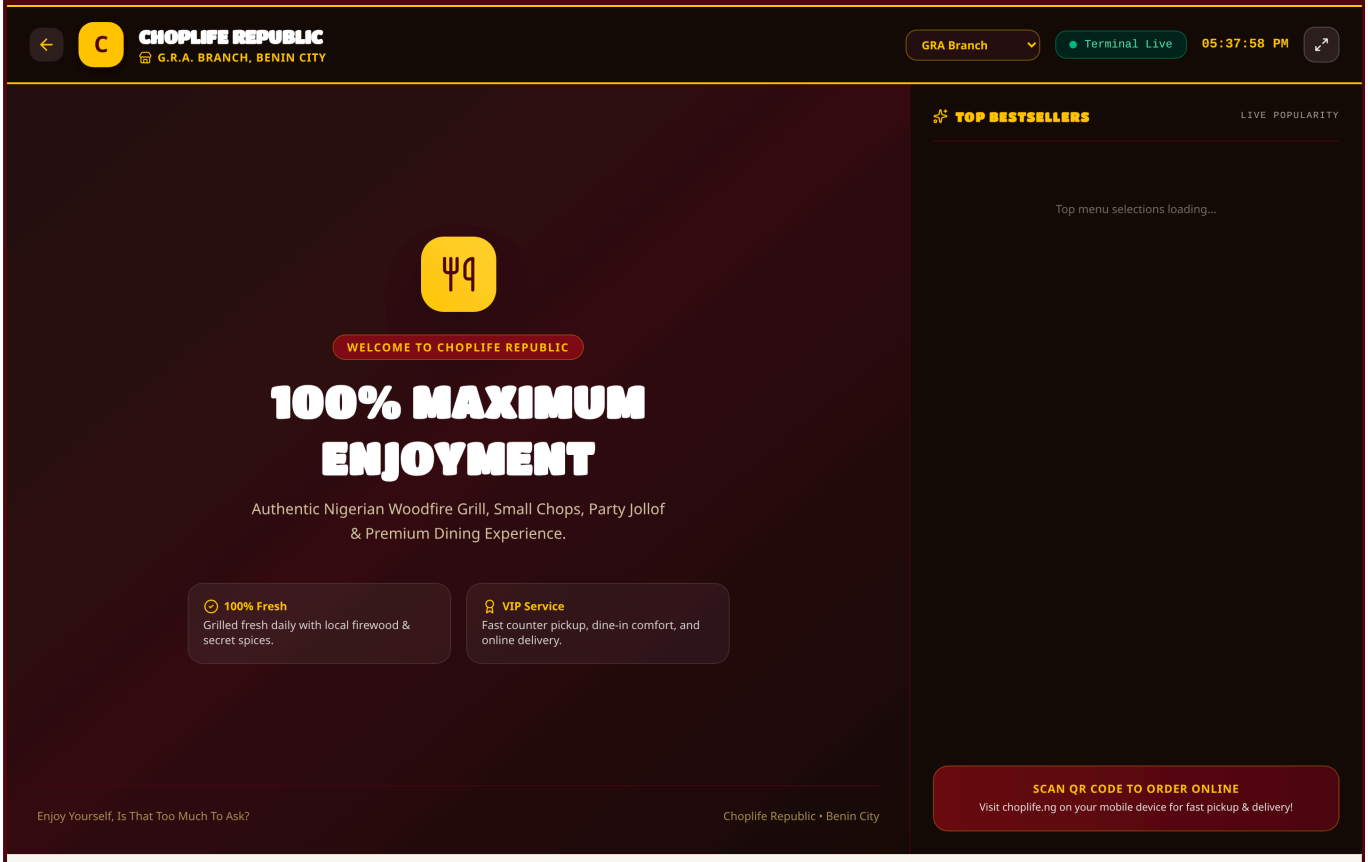

POS Check Settlement & Receipt Bridge

1. Select Check Type (Dine-In Table #4, Takeaway Counter, or Delivery Pickup).
2. Add items, specify line prep notes (*"Extra Pepper Sauce"*), and apply manager discount waivers if authorized.
3. Settle check via Cash (exact change calculator), Card Terminal (RRN), or Direct Bank Transfer.
4. Click **Complete Order & Print Receipt** to generate ESC/POS thermal output.

4. CUSTOMER FACING DISPLAY MODULE (/CFD)

The Customer Facing Display runs on counter screens oriented toward patrons during POS register transactions.

FIGURE 4: CUSTOMER FACING DISPLAY (CFD) **ROUTE: /cfd**

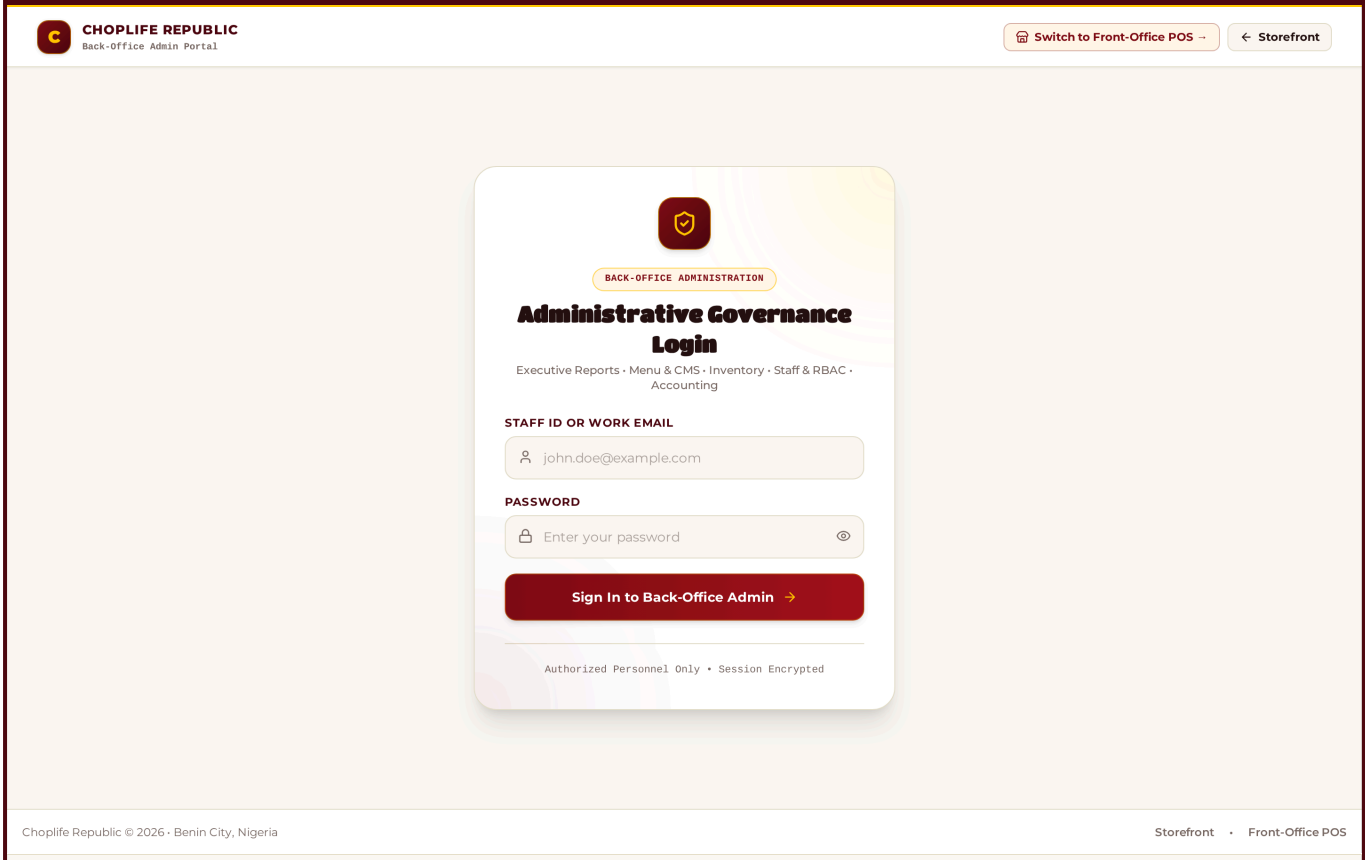

Screen Capture 4.1: Customer Facing Display showing Terminal Status Bar, Neutral Welcome Screen (*"100% Maximum Enjoyment"*), and Dynamic Top Bestsellers Showcase.

5. BACK-OFFICE ADMINISTRATION MODULE (/ADMIN)

The Back-Office Governance Portal provides executive BI analytics, master inventory control, shift reconciliation, expense claim processing, and staff RBAC privilege assignment.

FIGURE 5: BACK-OFFICE GOVERNANCE DASHBOARD **ROUTE: /admin**

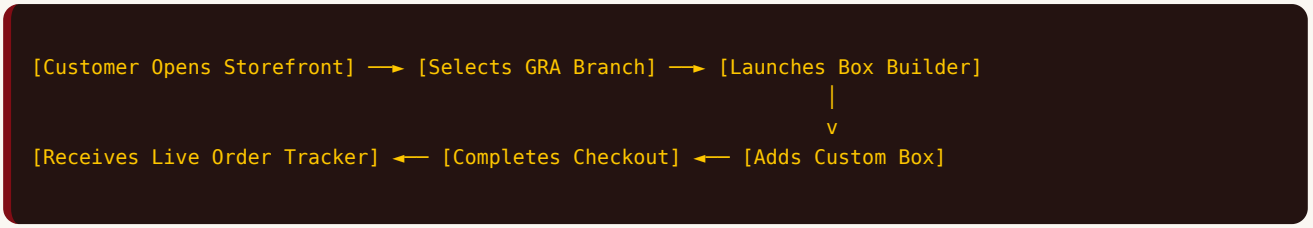

Screen Capture 5.1: Executive BI Dashboard showing Net Sales Metrics, Channel Distribution, Master Inventory Control Navigation, and System Audit Trail.

6. DETAILED END-TO-END USER JOURNEYS

Journey 1: Customer Online Ordering & Custom Box Building

Persona: Online Customer | **Start:** Storefront (`/`) | **Outcome:** Live Tracking Code CLR-8942

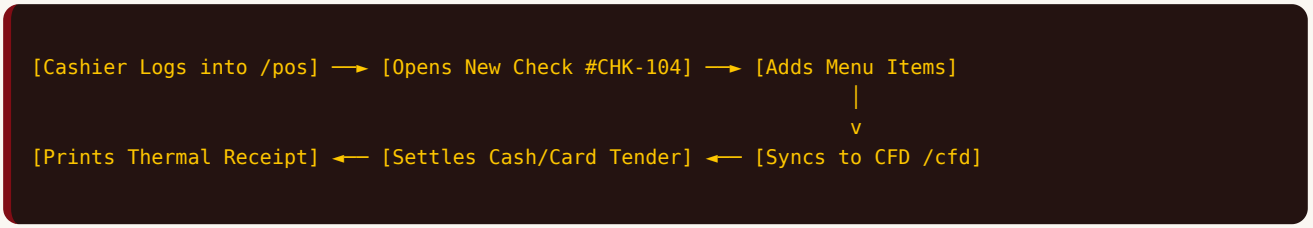

Step-by-Step Execution:

1. Access Storefront at `/`, select GRA Branch in Quick Branch Picker.
2. Click **Build Custom Box**: set 5 Puff Puff, 2 Samosas, 2 Spring Rolls, 1 Peppered Turkey.
3. System calculates total and assigns packaging `Food Tray 2300`. Add to Cart.
4. Proceed to Checkout: select Home Delivery, enter GRA street address.
5. Choose Paystack or Direct Bank Transfer proof upload. Receive tracking ID `CLR-8942`.

Journey 2: Front-Office Cashier POS Checkout & Settlement

Persona: Cashier / Storekeeper | **Start:** POS (`/pos`) | **Outcome:** Thermal Receipt Printed

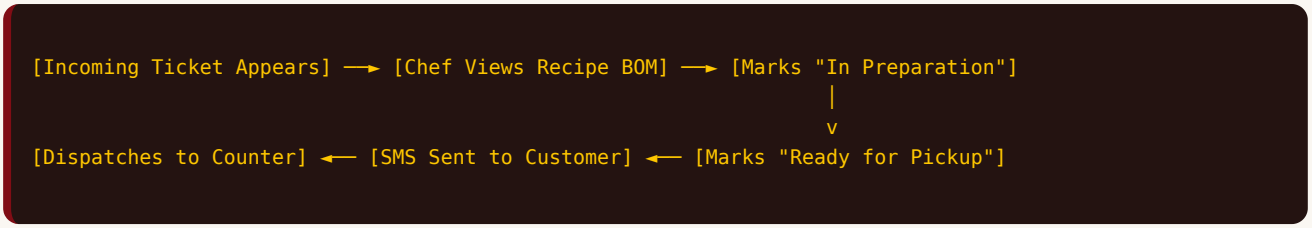

Step-by-Step Execution:

1. Log into `/pos` workspace; click **New Check** (Dine-In Table #4 or Takeaway).
2. Tap product cards (Mega Platter ₦13,300, Soft Bread ₦1,200 x2) to populate check line items.
3. Apply waiver/discount if authorized. Line items stream live to Customer Display (`/cfd`).
4. Click **Settle Payment** (Cash/Card/Transfer). Complete order and trigger ESC/POS thermal printer.

Journey 3: Kitchen Production & Order Dispatch (KDS)

Persona: Kitchen Lead / Chef | **Start:** KDS View (`/pos`) | **Outcome:** Customer SMS Sent

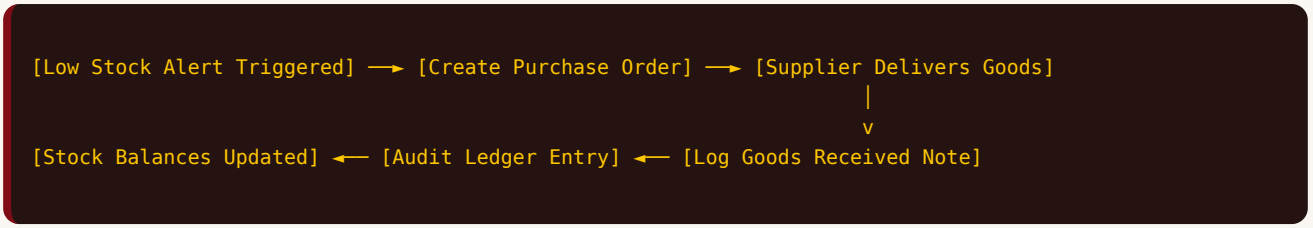

Step-by-Step Execution:

1. Monitor incoming KDS order queue tickets sorted by urgency timer rings.
2. Review Recipe BOM assembly ingredients (0.25 kg Rice, 0.30 kg Chicken, Pack 500).
3. Mark ticket **In Preparation** (status: `preparing`).
4. Complete cooking; mark ticket **Ready for Pickup**. System dispatches Termii SMS to customer.

Journey 4: Inventory Procurement & Goods Received Notes (GRN)

Persona: Store Manager | **Start:** Admin Inventory (`/admin`) | **Outcome:** Stock Balances Updated

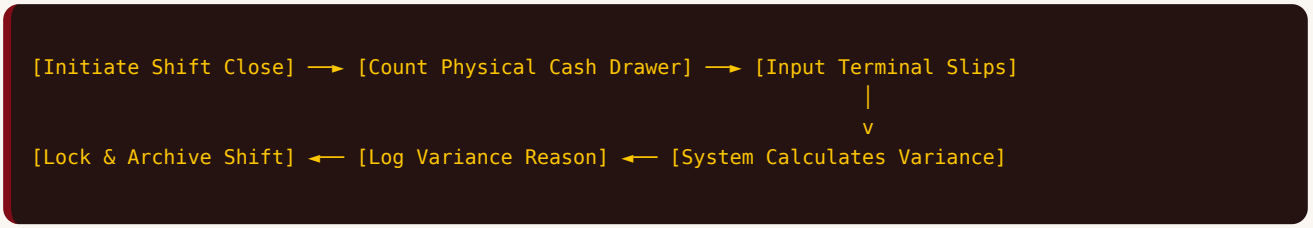

Step-by-Step Execution:

1. Review stock balances across GRA, Okabere, and Ugbowo branches. Identify items below reorder threshold.
2. Create Purchase Order (PO) for supplier (*Benin Central Grain Ltd*).
3. Upon delivery, click **Receive Goods (GRN)**. Record accepted quantities and invoice reference.
4. Confirm GRN -> Raw ingredient inventory balances increase, and financial ledger debits post automatically.

Journey 5: Shift Manager Cash Reconciliation & Z-Report Close

Persona: Branch Manager | **Start:** Shift Management (`/pos`) | **Outcome:** Locked Shift Period

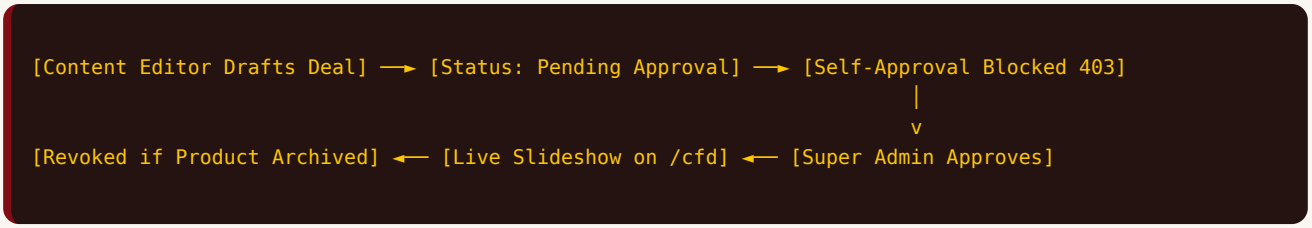

Step-by-Step Execution:

1. At shift end, click **Close Shift & Z-Report** in POS navigation bar.
2. Input physical cash counted in drawer, POS card slips, and bank transfer receipts.
3. System compares physical counts against system recorded sales and calculates shift variance.
4. Enter mandatory variance explanation; submit Z-Report to lock shift period and notify accounting.

Journey 6: Marketing Campaign Creation & Segregation Approval

Persona: Content Editor / Super Admin | **Start:** Admin CMS (`/admin`) | **Outcome:** Live CFD Deal Rotation

Step-by-Step Execution:

1. Content Editor drafts promotion deal (*"Weekend Woodfire Special"* - 20% off Peppered Turkey). Status: `pending_approval`.
2. Content Editor attempts self-approval -> System blocks with `403 Forbidden` (Segregation of Duties Enforced).
3. Super Admin reviews and approves campaign -> Status: `approved` / `published`.
4. Campaign instantly rotates in Customer Facing Display (`/cfd`) slideshow.
5. If product is later set to `archived` in Menu Catalogue -> System automatically revokes promotion.

7. USER ROLES & TROUBLESHOOTING MATRIX

Symptom / Error	System Area	Root Cause Analysis	Verified Recovery Procedure	Prohibited Action
"API endpoint not found"	Express REST API (`/api/*`)	Route requested without required `/api/` prefix.	Verify request URL starts with `/api/`. Restart dev server via `restart_dev_server`.	Do not remove route prefixes or create un-prefixed root routes.
"Forbidden: Insufficient privileges"	POS / Admin Workspace	Staff account lacks required permission code.	Log out and log in with authorized role (e.g. `super_admin`). Review RBAC matrix.	Do not bypass client access controls.
Thermal Printer Disconnected	POS Hardware	Network printer bridge socket offline or IP misconfigured.	Verify IP in `/pos` -> **Printers**. Run Hardware Diagnostics Test.	Do not clear local storage while checks are active.
Paystack Modal Fails to Open	Checkout Modal	Public key missing or network offline.	Check connection. Fall back to Direct Bank Transfer payment method.	Do not refresh during payment processing.
